

# Why do I need to stay at Home?

## Corona Virus Social Story

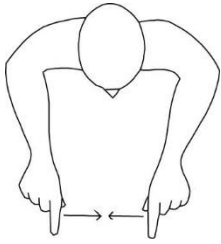

At the moment there is a virus or **bug** called **Corona Virus**

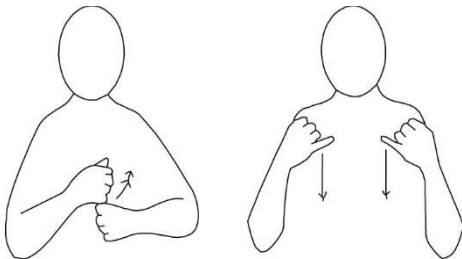

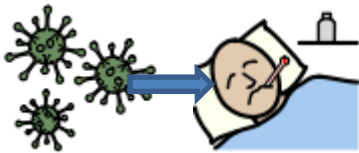

You might **hear** people talking about it. Or hear about it on the News (**TV**).

Sometimes Corona Virus gets called 'COVID 19' as well.  
It is the **same** thing.

A virus is something which can **make** people **poorly** if it gets in their body. A virus is a bit like a cold or the flu.

People with Corona virus can

Have a headache  *(use flat hand, facing body, shake this in front of head to indicate pain in head)*

feel **cold** 

feel **hot**

have a **sore throat**

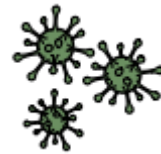

*(use the pain sign again*

*over the throat)*

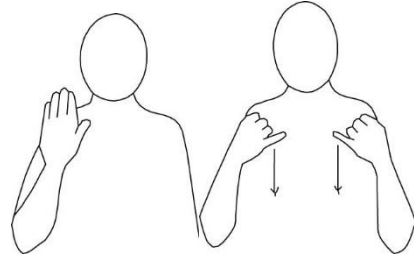

and have a **cough**.

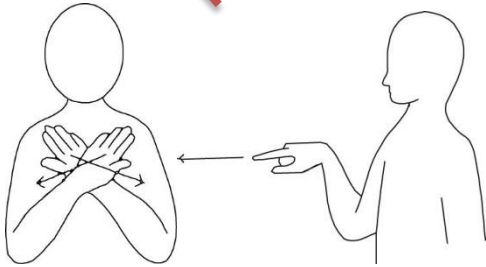

**Everybody** has to **stay at home** to **help stop** the **virus** spreading.

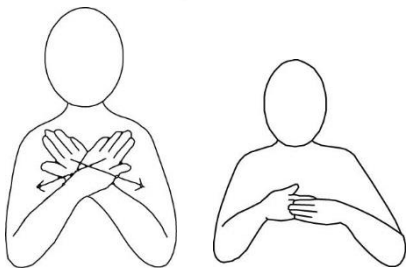

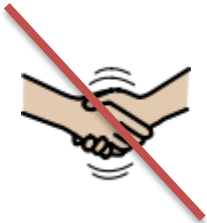

'C' hands  
make short  
firm movement  
down

We **do not** go out to see people right now.

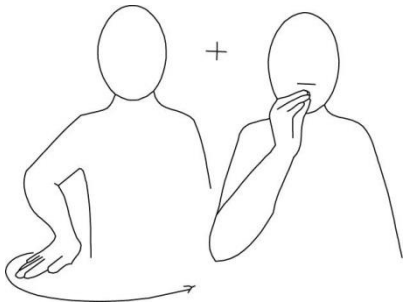

We **do not** hold hands with people right now.

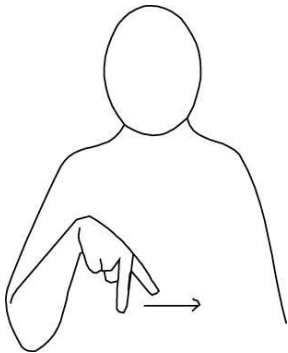

I do jobs and **fun** things at **home**.

I can go out in the **garden**

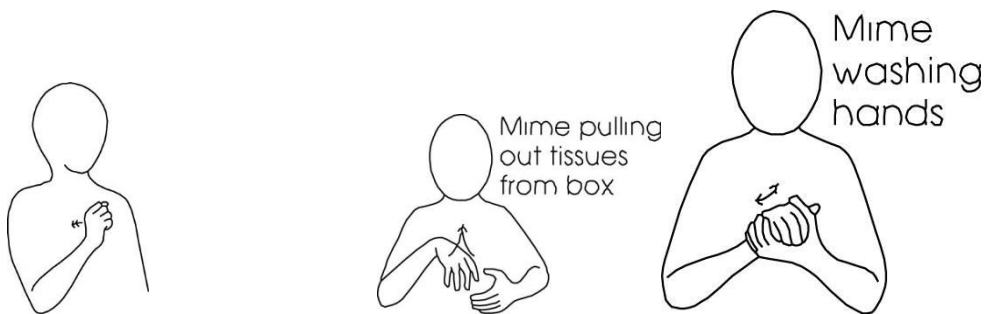

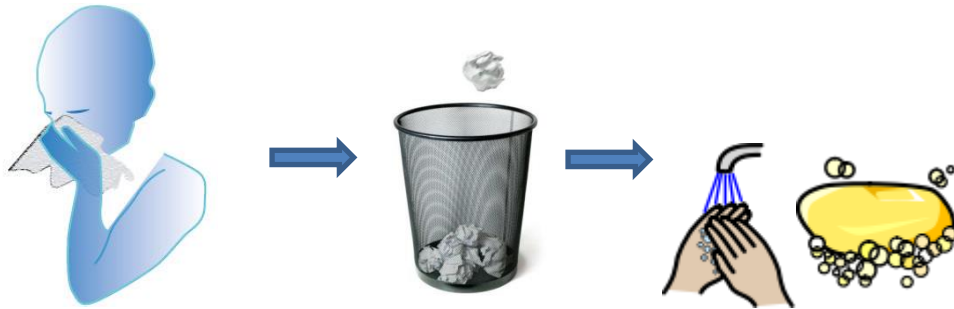

or for a **walk** to get some fresh air.

Keeping clean keeps the virus away. So I **wash my hands** with soap and water.

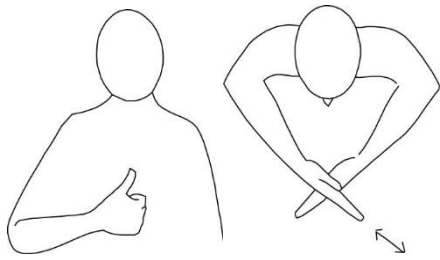

If I **cough or sneeze** I use a **tissue**. I put it in the bin and then I **wash my hands**.

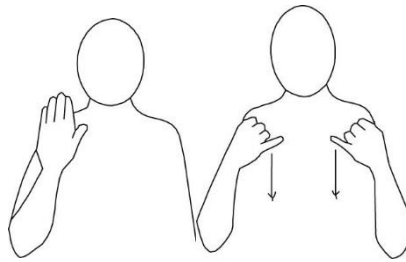

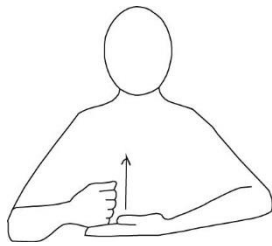

It can be frustrating when things are different. It can be **difficult** not going out.

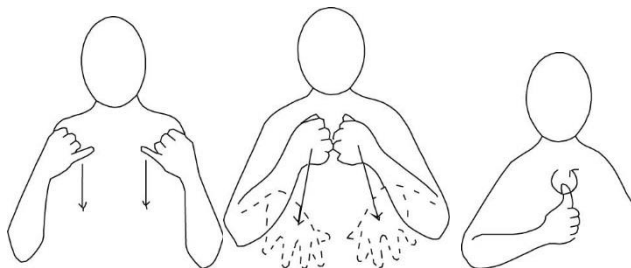

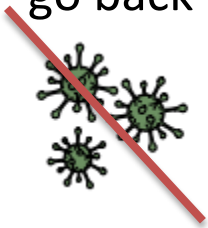

I am doing a really **good job** by staying at home.

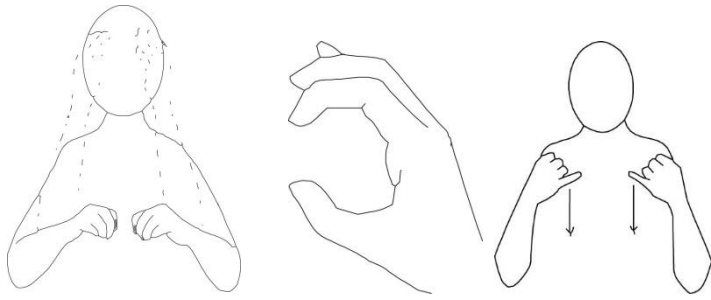

I am **helping to stop** the **virus**

When Corona **Virus** is gone (**finished**) everything will go back to normal/ be **okay**.

I have been **learning** about the **Corona Virus**.

**The end.**
